New Products for People

11 People create ideas for new products all the time. Some new
22 products are made just for fun. Others improve people’s quality of
23 life.
34 A big company now makes swim goggles without straps. You stick
46 the goggles on your face. There are two separate lenses. You stick
60 each one over an eye. They stay in place even when you dive. Speed
67 swimmers use them to swim even faster.
79 Another company makes a new kind of toothbrush box. It has a
90 special kind of light. The light kills germs. Just leave your
101 toothbrush inside. You can be sure it will be really clean.
111 Do you think watermelons are too heavy? Plant scientists have
124 now come up with a smaller watermelon. It weighs only 4 to 6
134 pounds. It tastes sweeter than big watermelons. Now you won’t
145 have to carry heavy watermelons to picnics anymore. You can take
149 small, light ones instead.
160 Do your shoelaces keep coming loose? Now you can get rubbery
175 tubes to keep them tied. They are easy to put on the laces. They also
188 last until your shoes wear out. Do you have an idea that will
198 develop a new product for people? What is your idea?
